WAR NEWS, BOTH SIDES CLAIMING.

London, Oct. 22 (6:16 p. m.).—"The furious bombardment between Ostend and Nieuport continues to-day," according to a dispatch appearing in the Telegraaf of Amsterdam and telegraphed to London by the correspondent in that city of the Exchange Telegraph Company. "The Germans are firing from Mariakerke and Middelkerke, the French from Nieuport, and the English from their warships. English aviators directed the fire of the Allies on the Germans positions."

Paris, Oct. 22.—The Allies are rolling back the German line. They have pushed a wedge through the invading forces thirteen miles north of Lille and for the first time since the series in the North commenced they have pushed their forces east of Lille. The advantage gained is slight, two miles, but it is important. The Allies are now in a position to envelop the German right flank.

Officials at Gen. Gallieni's headquarters declare that the Germans have lost the chief move in the strategical maneuvering in their failure to maintain the perpendicular line extending from Lille to the coast near Ostend.

They declare that the center of the German right flank has been pierced and that it is only a question of a short time when the German headquarters at Lille must move eastward or be captured.

In a distance of only forty-five miles three separate battles of extreme violence are in progress. From Nieuport, ten miles south-east to Dixmude, the Belgian army, re-enforced by the naval brigade and covered by the guns of the British war fleet, are rolling the Germans back. The Germans have left 10,000 dead and wounded on the field here.

From Dixmude, twelve miles south of Ypres, there is no fighting. The Germans and Allies maintain a line there, but it has not been marked with any general encounter since Monday. Beginning at Ypres and extending nine and one-half miles southeast to Menin there is a second battle. The Germans were forced back nearly three miles last night.

The Germans have mounted searchlights to command the territory and after shelling the allied position they assaulted in force. The French forces had a score of masked batteries in waiting. The Germans were literally cut to pieces by the fire of the French three inch gun and the rapid-firers. The battle lasted several hours and the German line was forced back. Their first line of trenches was occupied by the Allies.

From Warneton to La Bassee, a distance of eighteen miles, continuous fighting is in progress along a line running northeast from La Bassee. The Germans are in great strength and have delivered a series of violent assaults, but at no point have they been able to gain any territory. Their losses at this point are very heavy.

Paris, Oct. 22 (2:45 p. m.).—The official announcement issued this afternoon by the French War Office says the position occupied by the Allies in Belgium and Northern France have been maintained in spite of the violent attacks of the enemy. The text of the announcements follows.

"On our left wing German forces in considerable strength have continued their violent attacks, particularly in the vicinity of Dixmude, Warneton, Armentieres, Radinghem and La Bassee, but the positions occupied by the Allies have been maintained.

"On the rest of the front the enemy has delivered only partial attacks. These all have been repulsed, particularly at Fricourt, to the east of Albert; on the plateau to the west of Craonne; in the region of Souain, in the Argonne district; at Four de Paris; southwest of Varennes; in the region of Malancourt, in the Woivre district; in the direction of Champlon and at a point southeast of St. Mihiel, in the forest of Ailly.

"We have made slight progress in the Argonne district and in the southern part of the Woivre, in the forest of Mortmare.

"Russia: The forward movement of the Russian forces has been positively announced. An important success in the region of Warsaw has driven back the enemy more than thirteen kilometers (eight miles). The advances of Russians at Ivangorod and to the south of Przemyel are equally perceptible."

This is the "Thornhill" Wagon—the Wagon that Must Make Good

The best known materials—the labor of master workmen—the aid of the most ingenious modern machinery have been employed to make the Thornhill wagon.

The wheels are made with excessive care. For the spokes the manufacturers use the finest hickory—machine driven to insure the right dish. The hubs are of oak, thoroughly seasoned and banded with double refined sable iron.

The bolsters are of the best white oak. They have an iron plate at top and bottom, riveted through and through—multiplying their strength.

The "Thornhill" has a malleable front hound plate that is braced to the hounds at all points. This is an exclusive "Thornhill" feature. It prevents the

gears from ever getting out of line and causing hard pulling.

"Thornhill" wagons are equipped with long sleeve malleable—non-breakable skeins that insure light running, and outlast any other skein. Each skein is fitted to its axle with a Defiance machine—infallibly accurate. This machine insures the right pitch and tuck, makes light draft a certainty.

The axles are of toughest hickory—the steel axles of the best refined steel. The sides of "Thornhill" beds are made of poplar. It costs the makers more—but it holds paint better and gives better service.

Come in and see this wagon—sold under a binding guarantee.
